PROCESS FOR TREATING HARD METAL MOLDED BODIES. tr. by J. B. 10 Jan 61, 4p.
Order from I.C. or S.L.A. m\$1.80, ph\$1.80 61-15676

Trans. of Austrian patent 165,319, cl. 48b, by Metallwerk Plansee Gesellschaft M.B.H., appl. 7 Oct 47, beginning of pat. term 15 July 49, pub. 10 Feb 50.

A process is proposed for treating hard metal molded bodies, especially boreholes (e.g., drawing plates or dies), through chemical action and mechanical removal, characterized in that, preferably simultaneously with a known mechanical removal by grinding or the like, a chemical action through oxidizing alkaline treatment in an aqueous solution is effected. The chemical action can be carried out by anodic treatment of hard metals in alkaline solution.
